PLAN

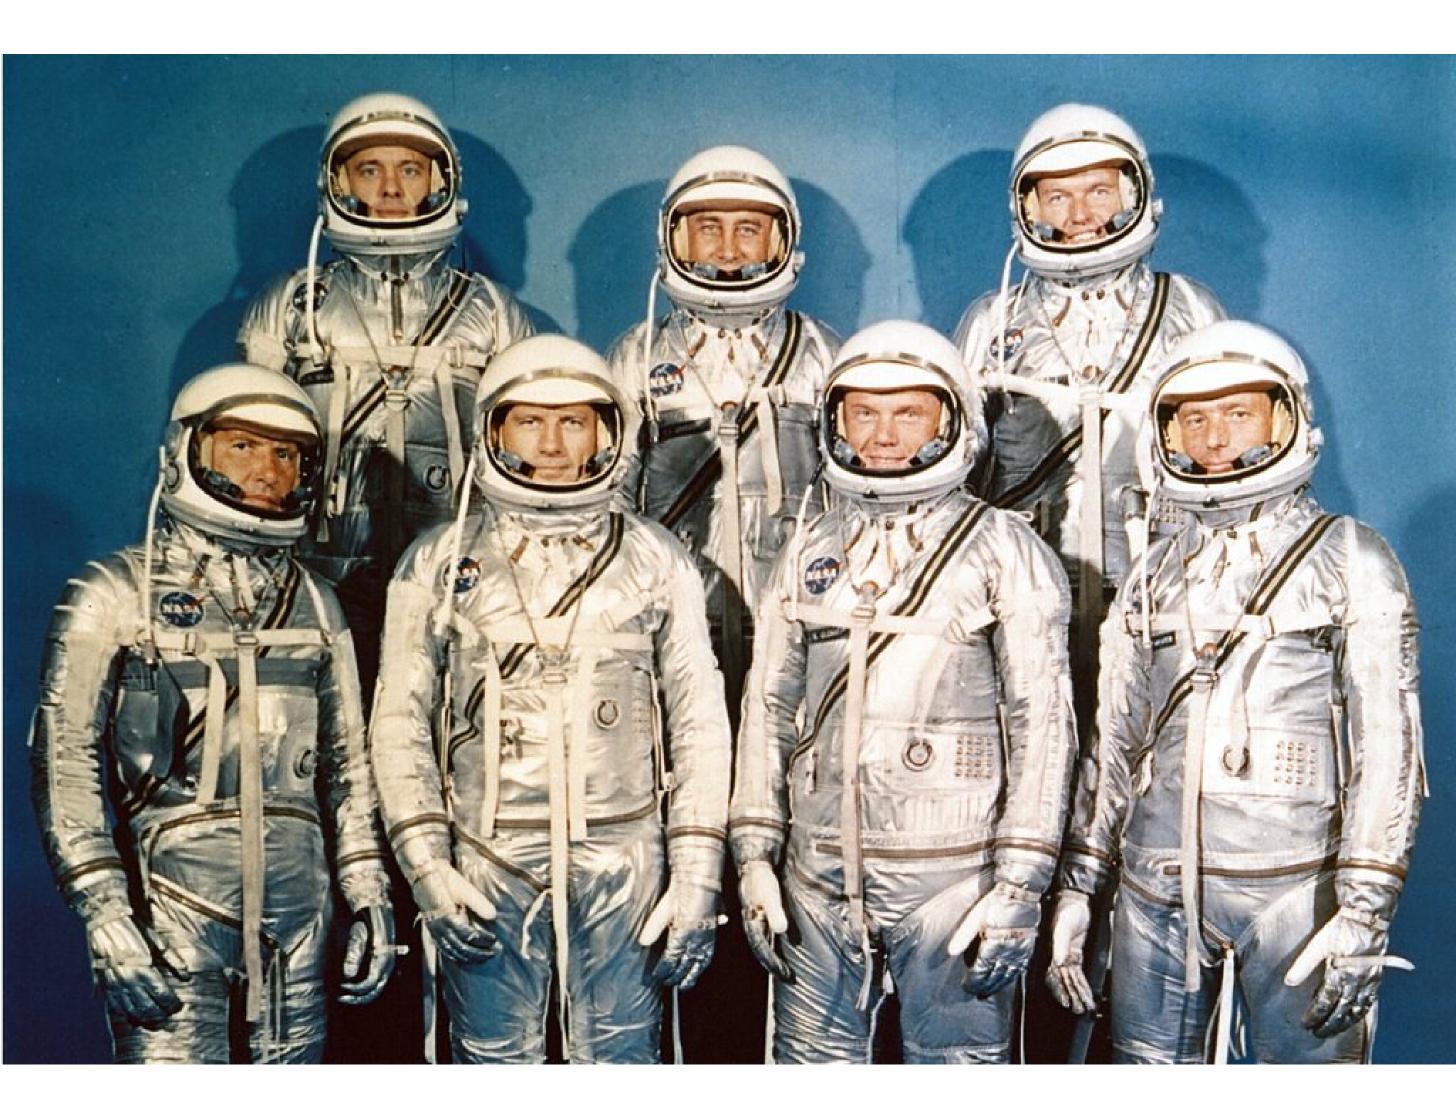

- 1. Tour d'horizon théorique
- 2. En pratique

TOUR D'HORIZON THÉORIQUE

Pourquoi ? Comment ?

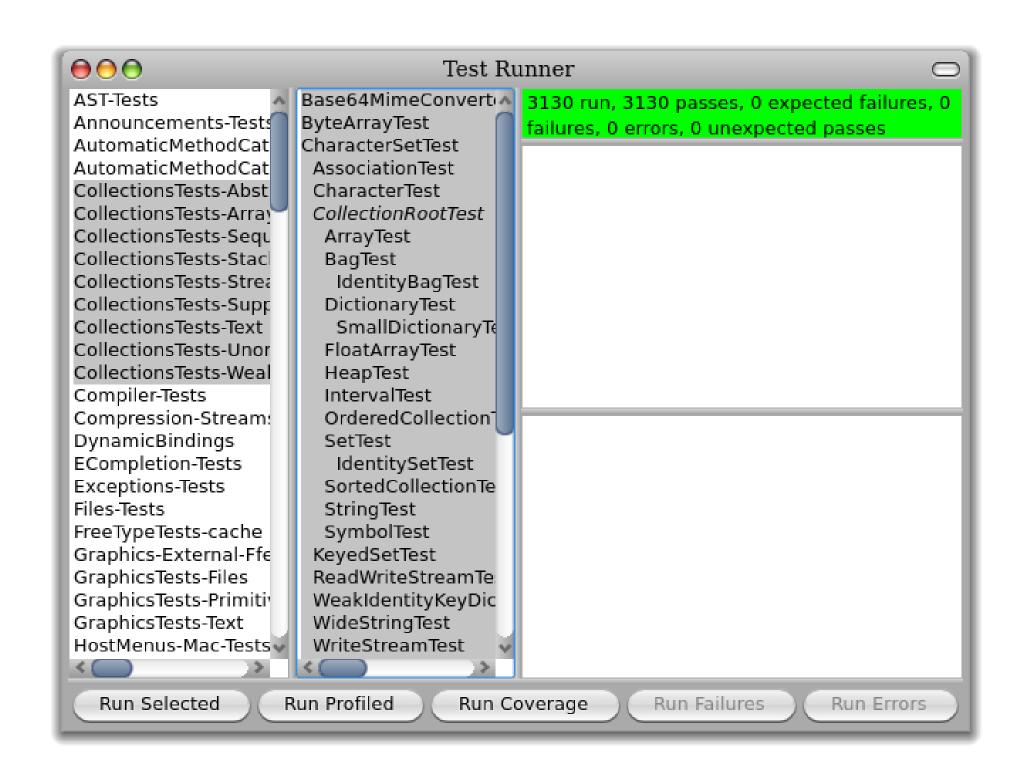

Beware of bugs in the above code; I have only proved it correct, not tried it.

Donald Knuth

N°	ACTION	ATTENDU	RÉSULTAT
1	Aller sur le site cloudnetcare.fr et cliquer sur le bouton « se connecter »	Ouverture de la page cloudnetcare.fr/connexion/	Ok
2	Rentrer une adresse email invalide sans @	Message d'erreur : Veuillez rentrer une adresse email contenant un @	Ok
3	Rentrer une adresse email valide sans compte actif	Message d'erreur : « Désolé, adresse email inconnue. »	Ok
4	Rentrer une adresse email valide avec compte actif sans mot de passe	Message d'erreur : « Merci de saisir votre mot de passe. »	Message absent
5	Rentrer une adresse email valide avec compte actif et bon mot de passe	Connexion au tableau de bord du client.	Ok

```
Feature: Is it Friday yet?
Everybody wants to know when it's Friday

Scenario: Sunday isn't Friday

Given today is Sunday

When I ask whether it's Friday yet

Then I should be told "Nope"
```

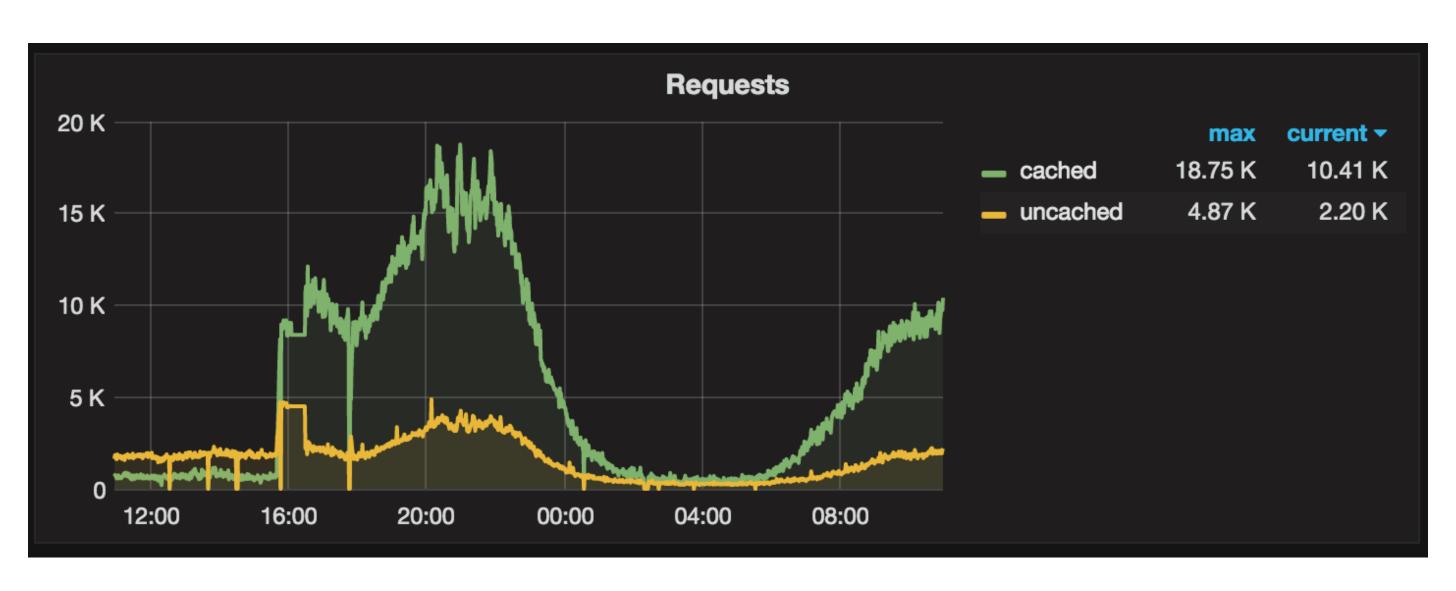

```
package hellocucumber;
import io.cucumber.java.en.*;
import static org.junit.Assert.*;
public class Stepdefs {
   private String today;
   private String actualAnswer;
   @Given("today is Sunday")
   public void today is Sunday() {
        today = "Sunday";
   @When("I ask whether it's Friday yet")
    public void i ask whether it s Friday yet() {
        actualAnswer = IsItFriday.isItFriday(today);
   @Then("I should be told {string}")
   public void i should be told(String expectedAnswer) {
        assertEquals(expectedAnswer, actualAnswer);
```

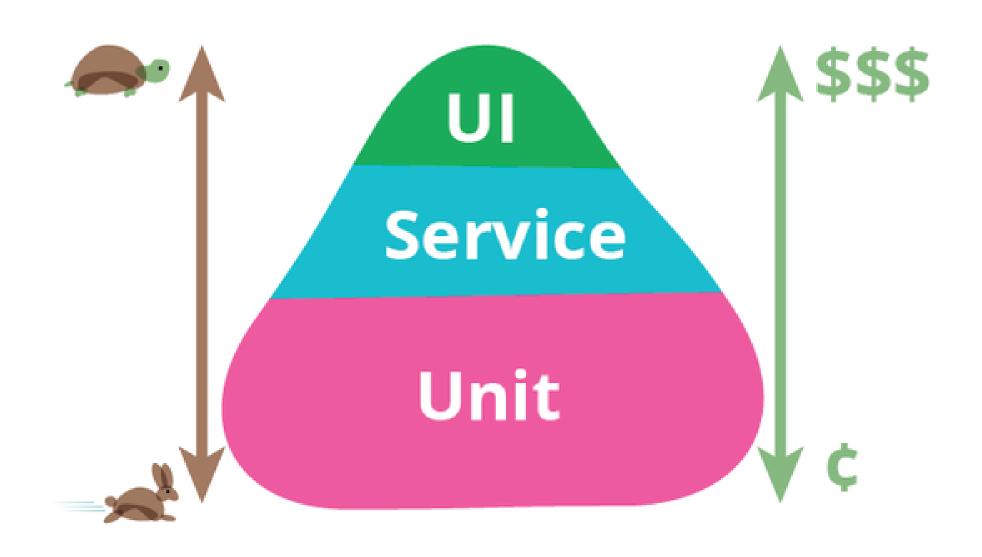

```
const assert = require('assert');
const { Given, When, Then } = require('cucumber');

Given('today is Sunday', function() {
    this.today = 'Sunday';
});

When("I ask whether it's Friday yet", function() {
    this.actualAnswer = isItFriday(this.today);
});

Then('I should be told {string}', function(expectedAnswer) {
    assert.equal(this.actualAnswer, expectedAnswer);
});
```

PROPRIÉTÉS DÉSIRABLES DES TESTS

- Isolated
- Composable
- Fast
- Inspiring
- Writable
- Readable
- Behavioral
- Structure-insensitive
- Automated
- Specific
- Deterministic
- Predictive

COMBINAISONS POSSIBLES:

- Unit tests: Inspiring, writable, specific, fast ... not predictive?
- Acceptance tests: Readable (for non programmers), not fast or specific.
- Pour vous:
 - Automated
 - Isolated, Composable, Deterministic
 - Specific

Write a Make the failing test pass test

Refactor

Nat Pryce

```
